Location History

Date	State	Notice
------	-------	--------

April 08, 2025	Florida	<p>Florida’s climate is humid and subtropical, meaning the state has a long rainy season from May through October. The wet season can quickly result in flash floods, causing a lot of flood damage to cars and trucks. On the other hand, the winter months can be very dry, with drought conditions and even wildfires resulting in fire damage. At least residents don’t have to worry about harsh winter conditions or damage due to road salt.</p> <p>Florida has a population of 21,477,737 people driving 226,514 million miles per year. Unfortunately, the sunny state also has a high number of car-crash fatalities each year (2,950), with almost 3,200 deaths. Due to a high number of claims, Florida ranks number 4th in the country for expensive car insurance. The state has 7,670,861 registered vehicles on the roads and ranks in the 70% mark for traffic congestion, costing drivers a lot in wasted time and gas costs. A lot of travel in Florida is on highways and interstates rather than public roads. On a positive note, Florida ranks very high in terms of highway and roadway maintenance, and they keep their bridges updated and safe also. One of the reasons for the high fatality rate is that the state is a popular tourist destination.</p> <p>The state often experiences violent weather like tropical storms, hurricanes, and even tornados resulting in a lot of vehicle damage such as dents, hail damage, and breaking glass from debris flying. Florida sees a higher-than-normal average number of flat tires. Yet, Florida shows up in slot number 19 on Google Trends list of states with the fewest car problems.</p>

NHTSA Recalls

Good news! There are no recalls associated with your VIN in the NHTSA Recalls Database.

Manufacturer Information

BMW
 **GERMANY**
BMW Plant

Bayerische Motoren Werke, or BMW, was founded in Germany in 1916. Best known for producing one of the first all-electric vehicles in 1972, BMW originally produced plane engines during World War I. After the Treaty of Versailles banned German countries from producing warplanes, BMW began making motorcycles and eventually cars.

The first model of car BMW produced was the BMW Dixi 3/15, a two-seater vehicle with a 3-speed manual transmission and 15 horsepower. The vehicle was originally priced at 2,175 reichsmarks, equivalent to \$543.75 USD at that time. Today, BMW makes a variety of luxury cars, with their current model lines including the 1, 2, 3, 4, 5, 6, 7, and 8 series. They also make a line of SUVs and crossovers, the X1 through X7. The highest number of sales BMW has had in the US since 2005 was 346,023, which occurred in 2015.

BMW currently has plans to offer at least one fully electric vehicle in all of their key model segments, committing to reducing their overall carbon footprint and increasing their all-electric vehicle sales significantly by 2025. They have announced all-electric versions of the BMWi3, Mini Cooper SE, BMW iX3, BMW i4, and iX, as well as their 5 and 7 series. The company stated that it wanted to maintain its high level of luxury offerings while also creating efficient electric vehicles using newly developed high-voltage storage concepts and optimized cell designs.

Consumer Access Product Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on certain automobiles titled in the United States. NMVTIS is intended to serve as a reliable source of title and [brand](#) history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to NMVTIS. However, NMVTIS does not contain information on all motor vehicles in the United States because [some states](#) are not yet providing their vehicle data to the system. Currently, the data provided to NMVTIS by states is provided in a variety of time frames; while some states report and update NMVTIS data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers **are strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The [Approved NMVTIS Data Providers](#) (look for the NMVTIS logo) can include vehicle condition data from sources other than NMVTIS.

NMVTIS data **INCLUDES** (as available by those entities required to report to the System):

- Information from [participating](#) state motor vehicle titling agencies.
- Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and truck tractors. NMVTIS may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.
- Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.
- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
- Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit vehiclehistory.bja.ojp.gov for details on how to interpret the information in the system and understand the meaning of various labels applied to vehicles by the participating state motor vehicle titling agencies.
